A UX designer and a certified PMP professional with 10+ years of experience as a developer, tester and code analyst and project manager.
A good team player & leader with strong communication skills and practical approach to problems to create usable designs that are win-win solutions.
Fluent in English and B1 level proficiency in German.

EXPERIENCE

ROLE: UX DESIGNER (2020)
- **A one-stop app to get certified answers to your questions.**
Surveys & competitive research, formulating the problem statement, creating low to high fidelity prototypes using Adobe Xd and usability testing and design evaluation with personal and online interviews.
- **A vocabulary app as a quick tutoring system for busy users**
 Surveys, interviews & competitive research to identify requirements and design low fidelity prototypes on paper.

ROLE: PROJECT LEADER (2004-2008, 2018-2020)
- **Management Information System for a leading Asian bank**
- A 2-year project focusing on real time inputs and visualisation of information to help make decisions.
- Decision making time cut down to 30% by streamlining client reporting and regular stand-up meetings.
- Built team and client satisfaction by ensuring change request procedures.
- **Inhouse data cleansing product**
- An ongoing project for clean data for further processing.
- Successful product sales after introducing demo videos for on-demand product presentations along with sales pitch, and live demos to the client.
- Code analysis to ensure software efficiency (.NET, C#).
- **CMM level 5 certification** - Core Team member for Pune, India branch.
- **Quality Control** - Reviewed code, documentation, and Quality standards across projects.

ROLE: CODE ANALYST (2004)
- **Reminder app for Health Care domain**
- Reviewed and analysed code of existing software to weed out redundant code and suggested modifications to make program more efficient.

DEVELOPER (1999–2004, 2015-2017)
- **Inventory Management System for users with varied demographics**
- An in-house interface developed for IT team to keep track of short- and long-term IT equipment and other hardware. (Visual Basic, MS Access).
- **Design aid interface for heavy engineering domain**
- Requirements gathered from documented resources and modules developed using Visual Basic.
- **Service Order layer code owner and developer** for DMS 100 switches for a **leading telecom company.**
